Altan Kurt

Software Developer

altankurt.dev   altankurt   altankurt   altankurt   hello@altankurt.dev   Izmir, Turkey

Summary

My passion for software development is fueled by a commitment to creating innovative solutions and enhancing product development.

Skilled in React, Next.js and JavaScript, I am also constantly experimenting with different technologies to broaden my skill set, contributing significantly to both personal and open-source projects

My past experiences have endowed me with a profound understanding of teamwork and the ability to successfully complete projects within deadlines. With a clear vision of evolving into a full-stack developer, I am steadfast in my commitment to continuous learning and self-improvement.

Tech Skills

HTML5, CSS3, SASS, TailwindCSS, JavaScript, TypeScript, React.js, Next.js, REST API, Git, Vite, Figma

Projects

altankurt.dev ⬈
My personal website, crafted with current technologies, showcases my writings and professional works
- Built a **website** & **blog platform** with **Next.js**
- Developed **reusable** UI components
- Used **dynamic routing** for blog posts and **static** for the projects page
- Implemented a **modern** and **responsive** design with **TailwindCSS**
- Integrated **reading time** for content
- Added **theme switching** for multi-theme feature

GitHub ⬈

Wordigo ⬈
A platform where you can translate unfamiliar words while browsing the web with your browser, add them to your personal dictionary, and share them.
- I employed **Linear** to effectively **manage projects and tasks** for the team.
- Managed team **workflows** by overseeing **issues**, **sprints**, and **product roadmaps** to enhance project efficiency.
- Directed the **creation** and **tracking** of **product roadmaps** to ensure alignment with project objectives.
- Developed **Reusabule UI components** and style templates.
- Implemented authentication and **OAuth2** structure using **Next.js**.
- Added **multi-language** support and implemented necessary **SEO** optimizations.
- Coded the project's browser extension using **Plasmo**.

GitHub ⬈

Student Course Hub ⬈
A centralized platform designed for students to efficiently manage and navigate their courses
- Built a platform using **React** & **Vite** for top-tier performance
- Implemented **REST API** for course management
- Adopted **React Router v6** for seamless SPA navigation
- Implemented **authentication** system into the application
- Developed **reusable** UI components
